

VEGAN BLOOM BOX APPLICATION INSTRUCTIONS

BOOGIE VEGAN BLOOM COMBO BOX APPLICATION INSTRUCTIONS

ORGANIC AG PURE KELP DRY

Easy to apply. (Just 1 teaspoon per gallon of water & soil-drenched works wonders). Add to compost tea at 5 teaspoons per 5 gallons of full strength tea

Established and hungry plants: Add to containers / beds and thoroughly mix into the soil medium • Drench into the top 2-4 inches

Established Trees & Shrubs: Apply in a circle underneath the outer branches (drip line). For best results, drench into the top 1-3 inches.

General Use Rates at 1 teaspoon per Gallon, (applied as needed in periods of heavy feed needs).

DOWN TO EARTH VEGAN MIX

New Plantings: Containers: prior to planting thoroughly mix into the soil (medium) • Gardens: prior to planting mix into the top 2-4 inches • Holes: thoroughly mix into backfill soil (medium)

Established Plants: Spread around the base of the plants & gently work into the top 1-3 inches

Established Trees & Shrubs: Apply in a circle underneath the outer branches (drip line). For best results, gently work into the top 1-3 inches. - Follow all plantings with a thorough watering -

General Use Rates at Tbsp (Tablespoons) per Gallon or Cups per Cubic Foot of soil (medium)

Mild: 1 Tbsp-1/4 Cup • Medium: 2 Tbsp-1/2 Cup • Strong: 4 Tbsp-1 Cup Seeds: 1/2 Tbsp-1/8

Cup • New Plantings Per Hole: Small Plants: 2 Tbsp • Shrubs: 1/2 Cup • Trees: 1 Cup

Established Plants: 1 Tbsp per foot of plant height • Large-Fast Growing plants: 2 Tbsp per foot of plant height • Shrubs: 1/4 Cup per foot every 2 feet of height • Trees: 1/2 Cup per every 2 feet

of height Gardens: 1-2 Cups per 25 square feet (5ft x 5ft) or every 25 ft of planting row Use every 4 to 8 weeks or whenever needed

BOOGIE INSECT FRASS

* As a flower-stimulant and soil-tonic/inoculant, apply frass at the rate of 1 to 2 cups (approx. 5oz) per 10 sq ft. of plant-area. Use from 1/4 to 1 cup/gal and drench soil thoroughly. *Frass

foliar spray: Use 1/4 cup per gallon of water. * Tea-Brewing: Frass may be used to fortify compost-tea; add at the rate of 1 cup per 5 gals AACT (aerobically-activated compost tea) *

Important: Add to mature teas only! (Brew for 18 to 24 hours before adding to tea, then brew approximately 2 to 6 hrs longer).

NUTRITIONAL YEAST (Brewer's Yeast):

As a high phosphorous bloom food, apply yeast at the rate of 1 cup per 10 to 20 sq ft. of plant-area. Use in solution as a tea additive, (add at any time you desire in the brewing cycle), at 1/2 cup per 5 gallons of full strength brew; drench soil thoroughly. Drench around base of flowering plants and water in thoroughly.

BE SURE TO FOLLOW THE 9-11 RULES! (Use the above foods in living soil recipes only when depleted in EC/ PPM's). [Link here for a summary of the 9-11 rules of regenerative gardening.](#)
